AFFORDABLE SOLUTION TO IMPROVE WATER QUALITY

IN TANK TREATMENT

The World's No.1
 Most Effective
 In Tank Gravity
 Water
 Filter

Filter System
 To Remove
 Contaminants
 with

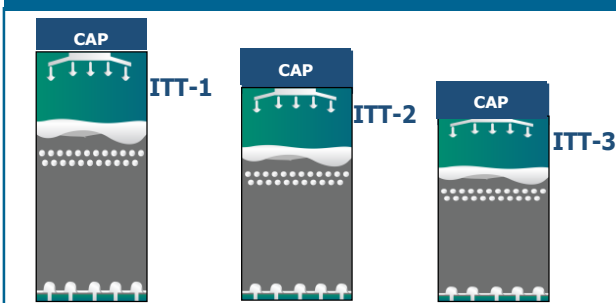

Fresh
 and Safe
 Water
 for
 Whole
 House

The most reliable filters in the world is to use gravity, without electricity and pressure to remove heavy metals, organics and toxins from city water. **City water** has a big journey which brings all kind of contaminants with very low water quality. **80%** of world's city water contains **harmful contaminants** including **Arsenic, Lead and Radioactive waste**. Around **90%** of the world population rely on bottled water. Around the world, packaged water is the main source for many of 2.8 billion people who don't even have access to safe and drinkable tap water. Latest findings about **plastic water bottles**, may have many people wondering that it is **True** that the water we drink is not fresh and "safe to drink?"

Watch Water® Multi Mix Media

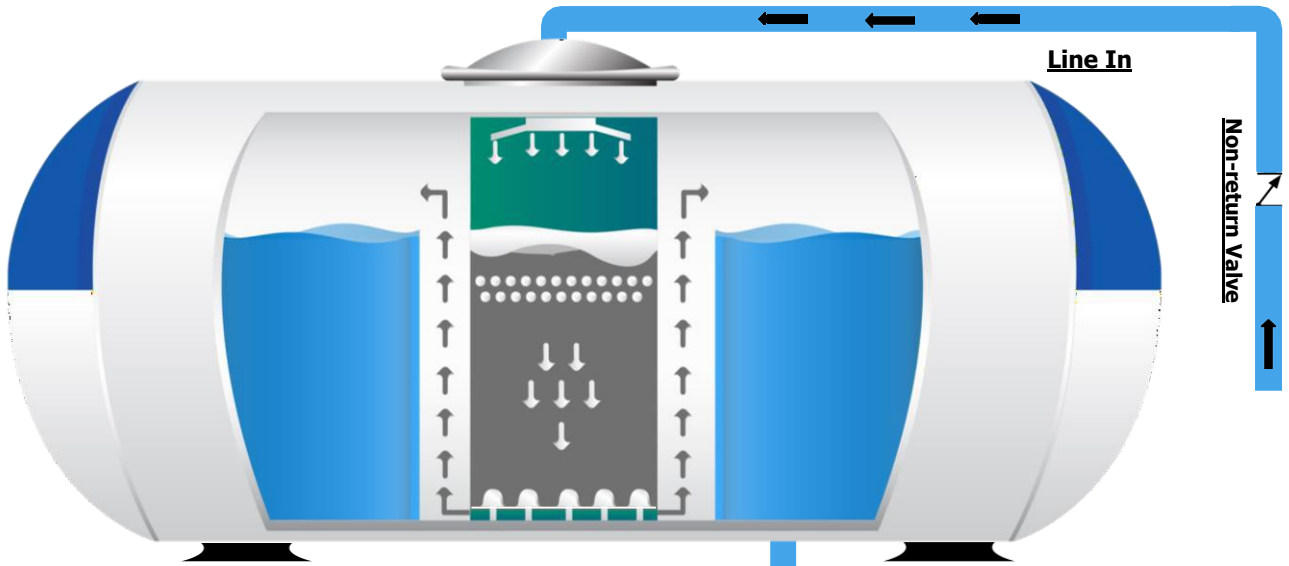

Contaminants	Media Used	Model
Acidic Water, Barium, Silicates & Ammonia		TRS
Arsenic, Radium, Selenium & Uranium	Titansorb	TS
Cadmium, Chromium, Molybdenum, Copper & Phosphates	Ferrolox	FL
Chlorine, Chloramine, Colour, Fluoride, Odors, Chromium, Cooper, Sulfar & Mercury	Catalytic Carbon	CC
Iron, Hydrogen Sulfide, Manganese	Katalox-Light	KL
Lead, Scale Prevention (Cations)	Filtersorb SP3	SP
Nitrates	Nitrotrapp	NT
Turbidity & Cloudiness	Crystalite	CR
TSS & Trace elements	Zeosorb	ZS
Scale Prevention (Cations & Anions)	Filtersorb CT	CT

AFFORDABLE SOLUTION TO IMPROVE WATER QUALITY

Clever Engineering

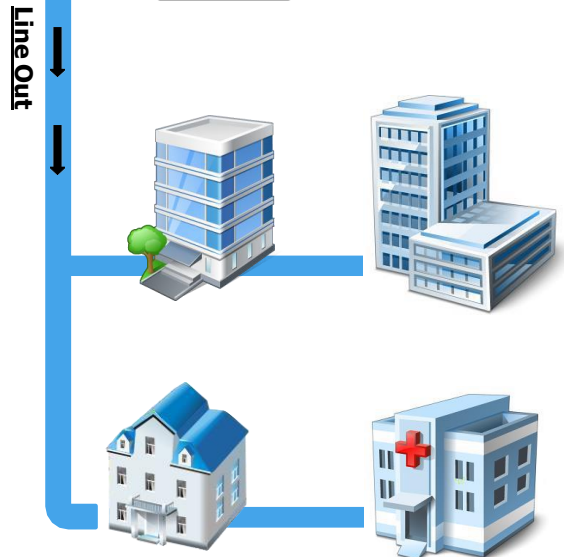

In all the buildings, houses around the world, there are millions of water **storage tanks** for municipal water use. Water is used for drinking, cooking and bathing. The **storage tanks** are placed on

- **The Roof**
- **Under the Roof**
- **On Ground**
- **Under the Ground**

All of these tanks have a **Line in** to supply the tank with water and naturally a **Line out** to the building or house to supply water for daily use. As all the Lines-out are at the tank bottom, though the tanks are refilled daily. The water at the top of the tank is never used and becomes stagnant, the top water layer can become a breeding ground for

- **Algae**
- **Bacteria**
- **Viruses**
- **Waterborne illness**

Waterborne illness such as Giardia and E. Coli. The Only cause of these waterborne illness is "**IF WATER IS NOT MOVING**".

Especially in the hot regions of the world you have to decide for "**IN TANK TREATMENT**". If you want the water fresh and safe for your family. Keep the water circulating. **Watch Water® Multi Mix Media** can be installed to **New and Existing Roof or Ground Water Tanks**.

AFFORDABLE SOLUTION TO IMPROVE WATER QUALITY

System

Pollutants

Moving the water will not solve the Organic and Inorganic problems. **Organic contaminants** are not the only source of contaminated water. So installation of activated carbon filter for buildings or houses is just **"useless"**

The same is for these Expensive Reverse Osmosis System's available in the market. Even some Inorganics are present in a very "Low Concentrations". After the Reverse Osmosis, they still have **carcinogenic effects** on humans and aquatic creatures. So it's important to find **safe and Reliable solution**.

Watch Water® Multi Mix

The **Watch Water®** struck on the idea of **Adsorbing pollutants** from water. As a major manufacturer of **Adsorbers** in water treatment industry. **The First method** used is **Titansorb-P** to adsorb **Arsenic, Phosphates** and some **Nitrates** including **Radioactive** elements like **Uranium**. **Second step** to **polish water** from Micropollutants such as pharmaceuticals, hormones and microplastics. In addition, even different types of Bacteria and Viruses. The zero valent from **coated activated carbon** and **Crystalite** are most effective **removing the pollutants in 10 minutes** with **95% to 99% effectiveness**, respectively with only 1 micron of water filtration. **Watch Water®** have also used **Trappsorb** as media to **adsorb Ammonia** and release the **World's No.1 Magnesium Mineral** to have a decent **Mineral Water** at home. Removing pollutants and contaminants from water using **Watch Water® Multi Media Technology** that is sustainable and affordable offers the potential to...

PROTECT HUMAN AND AQUATIC HEALTH WITHOUT EXPENSIVE TREATMENT PLANTS
