# SPECIAL SHOWER FILTER

Watch Water® has designed a unique **SPECIAL SHOWER HEAD WATER FILTER** system with Micro Spray shower head.

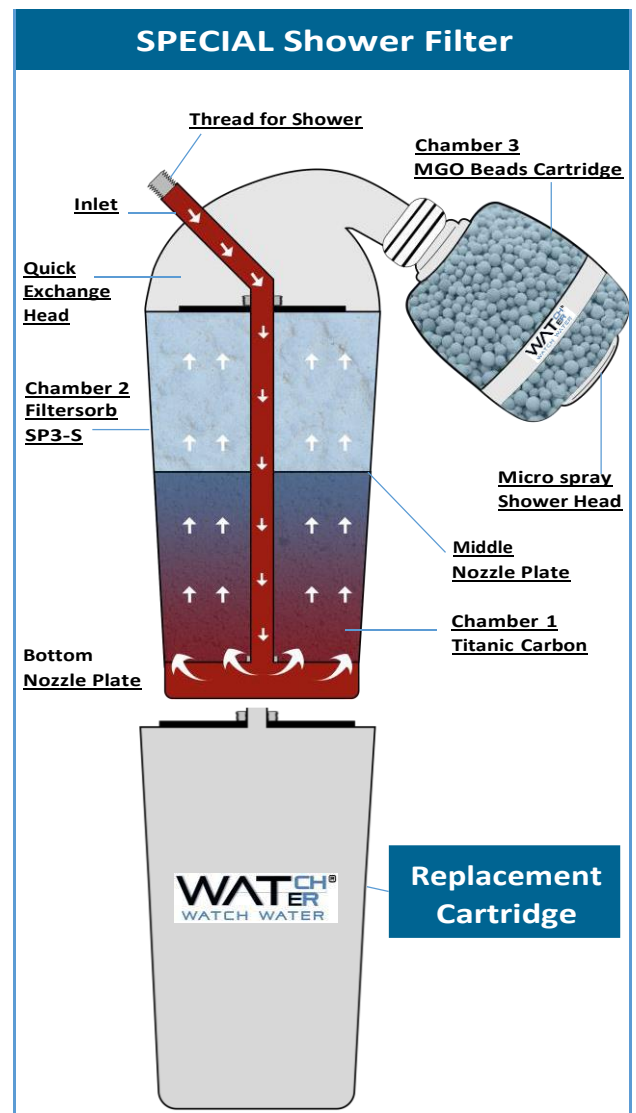

## 1. Shower only in Heavy Metal free Water.

**Titanic Carbon** is a mix of high grade **Powdered Activated Carbon (PAC)** with a mix of **Titansorb P** (Powder) and Granulated with a very special technology having a very high negative surface charge to **Adsorb** and **Remove** all kinds of **Heavy Metals** which also includes Arsenic, Fluorides, Lead, Copper, Mercury, Radionuclides like Cesium, Uranium, Radium including Hydrogen sulfide, Pesticides, Herbicides, Chlorine, Chloramine, THM's and Volatile Organic compounds (VOC's). **Titanic Carbon** is only manufactured by **Watch Water Germany**.

## 2. Your Skin starts to Breath and Recover.

**Filtersorb SP3-S** is a proprietary **Nucleation Assisted Technology** developed worldwide by **Watch Water®** and it works by converting **Carbon Hardness**  $\text{Ca}(\text{HCO}_3)_2$  into Harmless  $\text{CaCO}_3$  crystals and  $\text{CO}_2$ . The **Crystalline** hardness reduces the water surface tension, making it feel lighter and softer and increasing the lathering power of **Soaps** and **Shampoos**. If you will use water softeners your skin will feel slippery after showering that is because a softener will add sodium into your water and increases **Hypertension** which is a major cause of **High Blood Pressure**. The water softener makes the soap harder to rinse off

your skin. **Filtersorb SP3-S** shower filter will not add any salt, so the soap will rinse off easily and leave your skin feeling nice, clean & soft.

# SPECIAL SHOWER HEAD WATER FILTER

## 3. How does the Watch Water® Magnesium Technology Work?

As explained we generate CO<sub>2</sub> microbubbles in water. Microbubbles shower head CO<sub>2</sub> generation mechanism is so unique and in chamber **No.3** we exchanged this CO<sub>2</sub> and add Magnesium in the shower filter. The shower head that creates the microbubbles so small 0.1-0.5 microns to be exact, that its able to penetrate pores and hair follicles that's usually 90 microns in size and remove dirt and remove dead skin cells. It also removes excess **Selsun** and **bacteria**. **Diffuses Magnesium** into the cells and this is called deep cleansing and **Anti-Aging**. The skin starts to breathe again and just in one shower you lose your **Hypertension** and feel like a new born.

## 4. What's about the Anion Oxygen (O<sub>2</sub>)

After adding magnesium into the microbubbles your skin is **Highly Positive Charged** which will speed up the skin's recovery process and will promote over all well-being. No wonder you will be sleeping better after the shower. The major benefits of the microbubbles are that, they are also negatively charged. When **MGO** dissolves it delivers oxygen which is very effective to

make skin healthier. When these microbubbles are in contact with skin surface they remove harmful micro-organisms. As microbubbles are tiny, the bubbles would suspend in the water and the micro bubbles take up to 2 minutes to rise up to the surface. As a result, once the water is filled with these **Natural Essential** tiny bubbles of **Magnesium** and **oxygen**, it turns milky white within seconds and would turn back to its transparent state only minutes after. This whole process occurs without any use of chemicals. Apart from removing all toxic elements from the water, we add minerals which are difficult to get through food but effectively **Adsorbed** through the skin to help reducing.

- ✓ Inflammation
- ✓ Eliminate Toxins
- ✓ Balance Nerve functions and
- ✓ Regulate enzymatic reactions in the body as well as oxygen to improve your breathing.

You will feel it's a worthwhile long term investment for you and your whole family.
